- PS to the Hon'ble Chancellor
- PS to the Hon'ble Vice-Chancellor

# **Our Vision**

"To be a Leader and be recognized as an Institution striving for maintenance and enhancement of Quality Medical Education and Healthcare"

# **Our Mission**

- To be committed to promote sustainable development of higher education including Health science education, consistent with the statutory and regulatory requirements.
- Reflect the needs of changing technology and make use of the academic autonomy to identify the academic programs that are dynamic.
- Adopt global concepts in education in the healthcare sector.

#### Section - I

# Goals and General Objectives of Postgraduate Medical Education Program

#### Goal

The goal of postgraduate medical education shall be to produce a competent specialist and / or a medical teacher as stated in the Post Graduate Medical Education Regulations 2000 and its amendments thereof [May2018]

- (i) Who shall recognize the health needs of the community, and carry out professional obligations ethically and in keeping with the objectives of the national health policy.
- (ii) Who shall have mastered most of the competencies, pertaining to the specialty, that are required to be practiced at the secondary and the tertiary levels of the health care delivery system.
- (iii) Who shall be aware of the contemporary advances and developments in the discipline concerned.
- (iv) Who shall have acquired a spirit of scientific inquiry and is oriented to the principles of research methodology and epidemiology, and
- (v) Who shall have acquired the basic skills in teaching of the medical and paramedical professionals.

# **General Objectives**

At the end of the postgraduate training in the discipline concerned the student shall be able to:

- (i) Recognize the importance of the concerned specialty in the context of the health need of the community and the national priorities in the health sector.
- (ii) Practice the specialty concerned ethically and in step with the principles of primary health care.
- (iii) Demonstrate sufficient understanding of the basic sciences relevant to the concerned specialty.
- (iv) Identify social, economic, environmental, biological and emotional determinants of health in a given case, and take them into account while planning therapeutic, rehabilitative, preventive and promotive measures/strategies.
- (v) Diagnose and manage majority of the conditions in the specialty concerned on the basis of clinical assessment, and appropriately selected and conducted investigations.
- (vi) Plan and advice measures for the prevention and rehabilitation of patients suffering from disease and disability related to the specialty.
- (vii) Demonstrate skills in documentation of individual case details as well as morbidity and mortality data relevant to the assigned situation.
- (viii) Demonstrate empathy and humane approach towards patients and their families and exhibit interpersonal behavior in accordance with the societal norms and expectations.

- (ix) Play the assigned role in the implementation of national health programs, effectively and responsibly.
- (x) Organize and supervise the chosen/assigned health care services demonstrating adequate managerial skills in the clinic/hospital or the field situation.
- (xi) Develop skills as a self-directed learner; recognize continuing educational needs, select and use appropriate learning resources.
- (xii) Demonstrate competence in basic concept of research methodology and epidemiology, and be able to critically analyse relevant published research literature.
- (xiii) Develop skills in using educational methods and techniques as applicable to the teaching of medical/nursing students, general physicians and paramedical health workers.
- (xiv) Function as an effective leader of a team engaged in health care, research or training.

#### **Statement of the Competencies**

Keeping in view the general objectives of postgraduate training, each discipline shall aim at development of specific competencies, which shall be defined and spelt out in clear terms. Each department shall produce a statement and bring it to the notice of the trainees in the beginning of the program so that he or she can direct the efforts towards the attainment of these competencies.

#### **Components of the PG Curriculum**

The major components of the PG curriculum shall be:

- Theoretical knowledge
- Practical/clinical Skills
- Training in writing thesis/research articles
- Attitudes, including communication.
- Training in research methodology, medical ethics & medicolegal aspects
- Teaching skills to the undergraduates, juniors and support teams

Source: Medical Council of India, Regulations on Postgraduate Medical Education, 2000. [amended upto May 2018]

#### **Eligibility for Admission:**

1. Post graduate degree course:

The candidate seeking admission should have passed MBBS from a college recognized by Medical Council of India.

As per requisites of statutory bodies & as laid out in Post graduate regulations of MCI & its amendments thereof, the minimum percentage of marks obtained in the entrance test

conducted by competent authority shall be as per MCI regulations & its amendments as applicable time to time.

Eligibility for Foreign / PIO / NRI students will be based on qualifying examination marks and MCI amendments as applicable at the time of selection and admission process.

Candidates seeking admission to superspeciality [M.Ch]

The candidate seeking admission to superspeciality course should have passed MS/MD in concerned subjects (As per MCI regulations & its amendments thereof) or passed DNB in concerned broad specialities & should fulfill requirements of MCI regulations.

2. As per requisites of statutory bodies & as laid out in Post graduate regulations of MCI & its amendments thereof, the minimum percentage of marks obtained in the entrance test conducted by competent authority shall be as per MCI regulations & its amendments as applicable time to time.

Eligibility for Foreign / PIO / NRI students will be based on qualifying examination marks and MCI amendments as applicable at the time of selection and admission process.

#### The MCI norms to qualify for Admissions

Candidates seeking admission to these Post Graduate Degree courses should have passed M.B.B.S. recognized by Medical Council of India or equivalent qualification and should have obtained permanent Registration from the Medical Council of India or any of the State/ Medical council or candidate should register the same within one month from the date of admission, failing which the admission of the candidate shall be cancelled. Provided that in the case of a foreign national, the MCI may on the payment of prescribed fee for the registration, grant temporary registration for the duration of post graduate training restricted to the medical college/ institute to which the applicant is admitted for the time being exclusively for post graduate studies; provided further, that temporary registration to such foreign national shall be subjected to the condition that such person is duly registered with appropriate registering authority in his /her country wherefrom he has obtained his basic medical qualification ,and is duly recognized by the corresponding Medical Council or concerned authority.

If the candidate fails to fulfill the relevant eligibility requirements as mentioned above he/she will not be considered eligible for admission for Medical Postgraduate Degree Courses even if he/she is placed in the merit list of statutory authority and BLDE (Deemed to be University).

#### Obtaining Eligibility Certificate by the University before making Admission

Candidate shall not be admitted for any postgraduate degree course unless he/she has obtained and produced the eligibility certificate used by the University. The candidate has to make an application to the University with the following documents along with the prescribed fee:

- 1. MBBS pass/degree certificate issued by the University.
- 2. Marks cards of all the university examinations passed MBBS course.
- 3. Attempt Certificate issued by the Principal
- 4. Certificate regarding the recognition of the Medical College by the Medical Council of India.
- 5. Completion of internship certificate.
- 6. In case internship was done in a non-teaching hospital, a certificate from the Medical Council of India that the hospital has been recognized for internship.
- 7. Registration by any State Medical council and
- 8. Proof of SC/ST or OBC or physically handicapped status, as the case may be.

In addition to the above mentioned documents, candidate applying for admission to superspeciality courses has to produce degree/pass certificate of MD/MS/DNB degree with prescribed fee.

#### Intake of Students

The intake of students to each course shall be in accordance with the ordinance in this behalf.

#### **Course Duration**

a. M.D. / M.S. Degree Courses:

The course of study shall be for a period of 3 completed years including examinations. (MCI PG REG 2000 10:1)

b. D.M/M Ch Degree Courses; (MCI PG REG 2000, 10:2)

The duration of these courses shall be for a period of 3 completed years including examinations.

#### **Training Method**

The postgraduate training for degree shall be of residency pattern. The post graduate shall be trained with graded responsibilities in the management and treatment of patients entrusted to his/her care. The participation of the students in all facets of educational process is essential. Every candidate should take part in seminars, group discussions grand rounds, case

demonstration, clinics, journal review meetings, CPC and clinical meetings. Every candidate should be required to participate in the teaching and training program of undergraduate students. Training should include involvement in laboratory and experimental work, and research studies. Basic medical sciences students should be posted to allied and relevant clinical departments or institutions. Exposure to applied aspects of their learning should be addressed. Similarly, clinical subjects' students should be posted to basic medical sciences and allied specialty departments or institutions.

Training of superspeciality [M.Ch] should follow similar pattern. In addition, they have to be trained in advanced techniques of diagnosis and treatment pertaining to their specialty, participate actively in surgical operations as well.

#### **Attendance, Progress and Conduct**

A candidate pursuing degree course should work in the concerned department of the institution for the full period as a full time student. No candidate is permitted to run a clinic/laboratory/nursing home while studying postgraduate course

Each year shall be taken as a unit for the purpose of calculating attendance. Every student shall attend symposia, seminars, conferences, journal review meetings, grand rounds, CPC, case presentation, clinics and lectures during each year as prescribed by the department and not absent himself / herself from work without valid reasons. Every Candidate is required to attend a minimum of 80% of the training during each academic year of the post graduate course. This shall include assignments, assessment of full time responsibilities and participation in all facets of educational process. Provided further, leave of any kind shall not be counted as part of academic term without prejudice to minimum 80% attendance of training period every year. Leave benefits shall be as per university rules.

A post graduate student pursuing degree course in broad specialties, MD, MS and superspeciality courses DM, M.Ch would be required to present one poster presentation, read one paper in national/state conference and to present one research paper which should be published/accepted for publication/sent for publication during the period of his postgraduate studies so as to make him/her to be eligible to appear at the university degree examinations. (MCI, PG 2000, 13.9)

Any student who fails to complete the course in the manner stated above shall not be permitted to appear for the University Examinations.

#### **Monitoring Progress of Studies**

The learning process of students should be monitored through continuous appraisal and regular assessment. It not only helps teachers to evaluate students, but also students to evaluate themselves. The monitoring is done by the staff of the department based on participation of students in various teaching / learning activities. It may be structured and assessment done by using checklists that assess various aspects.

The learning out comes to be assessed include:

- Personal Attitudes,
- Acquisition of Knowledge,
- Clinical and operative skills, skills of performing necessary tests/experiments
- Teaching skills.
- Documentation skills

#### **Personal Attitudes:**

The essential items are:

- Caring attitude, empathy
- Initiative in work and accepting responsibilities
- Organizational ability
- Potential to cope with stressful situations and undertake graded responsibility
- Trust worthiness and reliability
- To understand and communicate intelligibly with patients and others
- To behave in a manner which establishes professional relationships with patients and colleagues
- Ability to work in team
- A critical enquiring approach to the acquisition of knowledge

The Methods used mainly consist of observation. Any appropriate methods can be used to assess these. It is appreciated that these items require a degree of subjective assessment by the guide, supervisors and peers. However every attempt should be made to minimize subjectivity.

#### **Acquisition of Knowledge:**

Lectures: Lectures/theory classes as necessary may be conducted. It is preferable to have one class per week if possible. They may, be employed for teaching certain topics. Lectures may be didactic or integrated.

The following selected common topics for post graduate students of all specialties to be covered are suggested here. These topics can be addressed in general with appropriate teaching-learning methods centrally or at departmental level.

- History of medicine with special reference to ancient Indian medicine
- Basics of health economics and health insurance
- Medical sociology, Doctor –Patient relationship, role of family in disease
- Professionalism & Medical code of Conduct and Medical Ethics
- Research Methods, Bio-statistics
- Use of library, literature search ,use of various software and databases

- Responsible conduct of research
- How to write an article, publication ethics and Plagiarism
- Journal review and evidence based medicine
- Use of computers & Appropriate use of AV aids
- Rational drug therapy
- National Health and Disease Control Programmes
- Roles of specialist in system based practice
- Communication skills.
- Bio medical waste management
- Patient safety, medical errors and health hazards
- Patient's rights for health information and patient charter.

These topics may preferably taken up in the first few weeks of the  $1^{st}$  year commonly for all new postgraduates and later in  $2^{nd}$  year or  $3^{rd}$  year as required during their progression of the programme. The specialty wise topics can be planned and conducted at departmental level.

a) Integrated teaching: These are recommended to be taken by multidisciplinary teams for selected topics, eg. Jaundice, Diabetes mellitus, thyroid diseases etc. They should be planned well in advance and conducted.

#### Journal Review Meeting (Journal club):

The ability to do literature search, in depth study, presentation skills, use of audio – visual aids, understanding and applying evidence based medicine are to be focused and assessed. The assessment is made by faculty members and peers attending the meeting using a checklist

#### Seminars / symposia:

The topics should be assigned to the student well in advance to facilitate in depth study. The ability to do literature search, in depth study, presentation skills and use of audio – visual aids are to be assessed using a checklist.

#### **Clinico-Pathological conferences:**

This should be a multidisciplinary case study of an interesting case to train the candidate to solve diagnostic and therapeutic problems by using an analytical approach. The presenter(s) are to be assessed using a check list similar to that used for seminar.

**Medical Audit:** Periodic morbidity and mortality meeting be held. Attendance and participation in these must be insisted upon. This may not be included in assessment.

Clinical Skills: Day to Day Work: Skills in outpatient and ward work should be assessed periodically. The assessment should include the candidates' sincerity and punctuality, analytical ability and communication skills

#### **Clinical Meetings:**

Candidates should periodically present cases to his peers and faculty members. This should be assessed using a check list.

**Group discussions**: Group discussions are one of the means to train and assess the student's ability to analyse the given problem or situation, apply the knowledge and make appropriate decisions. This method can be adopted to train and assess the competency of students in analyzing and applying knowledge.

**Death review meetings/Mortality meetings:** Death review meetings is important method for reflective learning. A well conducted morbidity and mortality meetings bring about significant reduction in complications, improve patient care and hospital services. They also address system related issues. Monthly meetings should be conducted with active participation of faculty and students. Combined death review meetings may be required wherever necessary.

#### **Clinical and Procedural Skills:**

The candidate should be given graded responsibility to enable learning by apprenticeship. The performance is assessed by the guide by direct observation. Particulars are recorded by the student in the log book.

#### **Teaching Skills:**

Candidates should be encouraged to teach undergraduate medical students and paramedical students, if any. This performance should be based on assessment by the faculty members of the department and from feedback from the undergraduate students

#### **Attitude and Communication skills:**

Candidates should be trained in proper communication skills towards interaction and communication with patients, attendees and society in general. There should be appropriate training in obtaining proper written informed consent, discussion and documentation of the proceedings. Structured training in various areas like consent, briefing regarding progress and breaking bad news are essential in developing competencies.

Variety of teaching –learning methods like Role play, video based training, standardized patient scenarios, reflective learning and assisting the team leader in all these areas will improve the skills. Assessment can be done using OSCE simulated scenarios and narratives or any appropriate means. Training to work as team member, lead the team whenever situation demands is essential. Mock drills to train and assess the readiness are very helpful.

#### Work diary / Log Book:

Every candidate shall maintain a Work Diary/Log Book and record his/her participation in the training programs conducted by the department such as journal reviews, seminars, etc. Special mention may be made of the presentations by the candidate as well as details of clinical or laboratory procedures, conducted by the candidate. A well written and validated Log Book reflects the competencies attained by the learner and points to the gap which needs address. This Log Book shall be scrutinized by concerned teachers periodically and certified, by the Head of Department and Head of the Institution, and presented during University Practical / Clinical examination.

#### **Periodic tests:**

In case of degree courses of three years duration (MD/MS, DM, M.Ch), the concerned departments may conduct three tests, two of them be annual tests, one at the end of first year and the other in the second year. The third test may be held three months before the final examination. The tests may include written papers, practical / clinical and viva voce.

One of these practical/clinical tests should be conducted by OSPE (objective structured practical examination or OSCE (objective structured clinical examination) method.

Records and marks obtained in such tests will be maintained by the Head of Department and sent to the University, when called for,

#### Assessment

Assessment should be comprehensive & objective. It should address the stated competencies of the course. The assessment needs to be spread over the duration of the course.

#### FORMATIVE ASSESSMENT, ie., assessment during the training would include:

Formative assessment should be continual and should assess medical knowledge, patient care, procedural & academic skills, interpersonal skills, professionalism, self directed learning and ability to practice in the system.

#### **General Principles**

Internal Assessment should be frequent, cover all domains of learning and used to provide feedback to improve learning: it should also cover professionalism and communication skills. The Internal Assessment should be conducted in theory and clinical examination.

Quarterly assessment during the Postgraduate training course should be based on following educational activities:

- 1. Journal based/recent advances learning
- 2. Patient based/Laboratory or Skill based learning
- 3. Self directed learning and teaching
- 4. Departmental and interdepartmental learning activity
- 5. External and outreach Activities/CMEs

**Records:** Records and marks obtained in tests will be maintained by the Head of the Departments and will be made available to the University or MCI.

#### **Procedure for defaulter:**

Every department should have a committee to review such situations. The defaulting candidate is counseled by the guide and head of the department. In extreme cases of default the departmental committee may recommend that defaulting candidate be withheld from appearing the examination, if she/he fails to fulfill the requirements in spite of being given adequate chances to set himself or herself right.

**Dissertation:** Every candidate pursuing MD/MS degree course is required to carry out work on a selected research project under the guidance of a recognized post graduate teacher. The results of such a work shall be submitted in the form of a dissertation.

The dissertation is aimed to train a post graduate student in research methods and techniques. It includes identification of a problem, formulation of hypothesis, search and review of literature, getting acquainted with recent advances, designing of a research study, collection of data, critical analysis and comparison of results and drawing conclusions.

Every candidate shall submit to the Registrar (Academic) of the University in the prescribed proforma, a synopsis containing particulars of proposed dissertation work within six months from the date of commencement of the course on or before the dates notified by the University. The synopsis shall be sent through the proper channel.

Such synopsis will be reviewed and the dissertation topic will be registered by the University. No change in the dissertation topic or guide shall be made without prior approval of the University.

The dissertation shall be written under the following headings:

- 1. Introduction
- 2. Aims or Objectives of study
- 3. Review of Literature
- 4. Material and Methods
- 5. Results

- 6. Discussion
- 7. Conclusion
- 8. Summary
- 9. References
- 10. Tables
- 11. Annexure

The written text of dissertation shall be not less than 50 pages and shall not exceed 150 pages excluding references, tables, questionnaires and other annexure. It should be neatly typed in double line spacing on one side of paper (A4 size, 8.27" x 11.69") and bound properly. Spiral binding should be avoided. The dissertation shall be certified by the guide, head of the department and head of the Institution.

Adequate number of copies as per norms and a soft copy of dissertation thus prepared shall be submitted to the Controller of Examinations six months before final examination on or before the dates notified by the University.

The dissertation shall be valued by examiners appointed by the university. Acceptance of dissertation work is an essential precondition for a candidate to appear in the University examination.

#### Guide:

The academic qualification and teaching experience required for recognition by this University as a guide for dissertation work is as per Medical Council of India Minimum Qualifications for Teachers in Medical Institutions Regulations, 1998 and its amendments thereof. Teachers in a medical college/institution having a total of eight years teaching experience out of which at least five years teaching experience as Lecturer or Assistant Professor gained after obtaining post graduate degree shall be recognized as post graduate teachers.

A Co-guide may be included provided the work requires substantial contribution from a sister department or from another medical institution recognized for teaching/training by this University / Medical Council of India. The co-guide shall be a recognized post graduate teacher of BLDE (Deemed to be University).

#### Change of guide:

In the event of a registered guide leaving the college for any reason or in the event of death of guide, guide may be changed with prior permission from the University.

#### **Schedule of Examination:**

The examination for M.D. /M.S and DM/M.Ch courses shall be held at the end of three academic years. The university shall conduct two examinations in a year at an interval of four to six months between the two examinations. Not more than two examinations shall be conducted in an academic year.

#### Scheme of Examination

#### M.D. /M.S. Degree

M.D. / M.S. Degree examinations in any subject shall consist of dissertation, written papers (Theory), Practical/Clinical and Viva Voce.

#### **Dissertation**:

Every candidate shall carryout work and submit a Dissertation as indicated above. Acceptance of dissertation shall be a precondition for the candidate to appear for the final examination.

#### **Written Examination (Theory):**

Written examination shall consist of **four** question papers, each of **three** hours duration. Each paper shall carry 100 marks. Out of the **four** papers, the 1<sup>st</sup> paper in clinical subjects will be on applied aspects of basic medical sciences and 4<sup>th</sup> paper on Recent advances, which may be asked in any or all the papers. In basic medical subjects and para-clinical -subjects, questions on applied clinical aspects should also be asked.

#### **Practical / Clinical Examination:**

In case of practical examination, it should be aimed at assessing competence and skills of techniques and procedures as well as testing students ability to make relevant and valid observations, interpretations and inference of laboratory or experimental work relating to his/her subject.

In case of clinical examination, it should aim at examining clinical skills and competence of candidates for undertaking independent work as a specialist. Each candidate should examine at least one long case and two short cases minimum. However additional assessment methods can be adopted which will test the necessary competencies reasonably well.

The total marks for Practical / Clinical examination shall be 300.

#### Viva Voce:

Examination shall aim at assessing depth of knowledge, logical reasoning, confidence and oral communication skills.

The total marks shall be 100:

- 80 Marks, for examination of all components of syllabus
- 20 Marks for Pedagogy

#### **Examiners:**

There shall be at least four examiners in each subject. Out of them two shall be external examiners and two shall be internal examiners. The qualification and teaching experience for appointment as an examiner shall be as laid down by the Medical Council of India.

Criteria for pass & distinction: Criteria for declaring as pass in University Examination: A candidate shall secure not less than 50% marks in each head of passing which shall include (1) Theory, (2) Practical/clinical and (3) viva voce examination. The candidate should pass independently in practical/clinical examination and Viva Voce: vide MCI pg 2000 Reg no 14(4) (Ciii)

Obtaining a minimum of 40% marks in each theory paper and not less than 50% cumulatively in all the four papers for degree examinations. Obtaining of 50% marks in Practical examination shall be mandatory for passing the examination as a whole in the said degree examination as the case may be.[amendment of MCI PG Regulations clause 14 dated 5.4.2018]

A candidate securing less than 50% of marks as described above shall be declared to have failed in the examination. Failed candidate may appear in any subsequent examination upon payment of fresh fee to the Controller of Examinations.

Declaration of distinction: A successful candidate passing the University examination in first attempt will be declared to have passed the examination with distinction, if the grand total aggregate of marks is 75 percent and above.

Distinction will not be awarded for candidates passing the examination in more than one attempt.

#### D.M/M.Ch Degree

DM/M.Ch Degree examinations in any subject shall consist of written theory papers (theory), practical/clinical and Viva voce.

#### **Written Examination (Theory):**

Written examination shall consist of **four** question papers, each of **three** hours duration. Each paper shall carry 100 marks. Out of the **four** papers, the 1<sup>st</sup> paper in clinical subjects will be on applied aspects of basic medical sciences. Recent advances may be asked in any or all the papers. In basic medical subjects and para-clinical -subjects, questions on applied clinical aspects should also be asked.

#### **Practical / Clinical Examination:**

In case of practical examination, it should be aimed at assessing competence and skills of techniques and procedures as well as testing students ability to make relevant and valid observations, interpretations and inference of laboratory or experimental work relating to his/her subject.

In case of clinical examination, it should aim at examining clinical skills, competence of candidates for undertaking independent work as a specialist. Each candidate should examine at least one long case and two short cases.

The total marks for Practical / clinical examination shall be 300.

#### Viva Voce:

Examination shall aim at assessing depth of knowledge, logical reasoning, confidence and oral communication skills.

The total marks shall be 100:

- 80 Marks, for examination of all components of syllabus
- 20 Marks for Pedagogy

**Examiners:** There shall be at least four examiners in each subject. Out of them two shall be external examiners and two shall be internal examiners. The qualification and teaching experience for appointment as an examiner shall be as laid down by the Medical Council of India.

**Criteria for passing and distinction**: Criteria for declaring as pass in University Examination: A candidate shall secure not less than 50% marks in each head of passing which shall include (1) Theory, (2) Practical including clinical and (3) viva voce examination. The candidate should pass independently in practical/clinical examination vide: MCI pg 2000 Reg no 144-c (iii).

Obtaining a minimum of 40% marks in each theory paper and not less than 50% cumulatively in all the four papers for degree examinations. Obtaining of 50% marks in Practical examination shall be mandatory for passing the examination as a whole in the said degree examination as the case may be.[amendment of MCI PG Regulations clause 14 dated 5.4.2018]

Declaration of distinction: A successful candidate passing the University examination in first attempt will be declared to have passed the examination with distinction, if the grand total aggregate of marks is 75 percent and above.

A candidate securing less than 50% of marks as described above shall be declared to have failed in the examination. Failed candidate may appear in any subsequent examination upon payment of fresh fee to the Controller of Examinations.

Declaration of distinction: A successful candidate passing the University examination in first attempt will be declared to have passed the examination with distinction, if the grand total aggregate of marks is 75 percent and above.

Distinction will not be awarded for candidates passing the examination in more than one attempt.

**Number of candidates per day:** The maximum number of candidates for practical / clinical and viva-voce examination shall be as under:

MD / MS Courses: Maximum of 8 per day DM/M.Ch Maximum of 3 per day

# **SECTION II**

# **MD IN PAEDIATRICS**

#### **Preamble**

The purpose of PG education is to create specialists who would provide high quality health care and advance the cause of science through research & training.

A post graduate student after undergoing the required training should be able to deal effectively with the needs of the community and should be competent to handle the problems related to his specialty including recent advances. S/He should also acquire skills in teaching of medical/paramedical students.

The purpose of this document is to provide teachers and learners illustrative guidelines to achieve defined outcomes through learning and assessment. This document was prepared by various subject-content specialists. The Reconciliation Board of the Academic Committee has attempted to render uniformity without compromise to purpose and content of the document. Compromise in purity of syntax has been made in order to preserve the purpose and content. This has necessitated retention of "domains of learning" under the heading "competencies".

# SUBJECT SPECIFIC OBJECTIVES

The o	bjectives of MD Course in Paediatrics are to produce a competent pediatrician who:
	Recognizes the health needs of infants, children and adolescents and carries out
	professional obligations in keeping with principles of the National Health Policy
	and professional ethics
	Has acquired the competencies pertaining to Paediatrics that are required to be
	practiced in the community and at all levels of health system
	Has acquired skills in effectively communicating with the child, family and the
	community
	Is aware of contemporary advances and developments in medical sciences as
	related to child health
	Is oriented to principles of research methodology
	Has acquired skills in educating medical and paramedical professionals
П	Is able to recognize mental conditions and collaborate with Psychiatrists/Child

# SUBJECT SPECIFIC COMPETENCIES

# A. Cognitive domain

Psychologists for the treatment of such patients

At the end of the MD course in Paediatrics, the students should be able to:

- 1. Recognize the key importance of child health in the context of the health priority of country
- 2. Practice the specialty of Paediatrics in keeping with the principles of professional ethics
- 3. Identify social, economic, environmental, biological and emotional determinants of child and adolescent health, and institute diagnostic, therapeutic, rehabilitative, preventive and promotive measures to provide holistic care to children
- 4. Recognize the importance of growth and development as the foundation of Paediatrics and help each child realize her/his optimal potential in this regard
- 5. Take detailed history; perform full physical examination including neurodevelopment and behavioral assessment and anthropometric measurements in the child and make clinical diagnosis
- 6. Perform relevant investigative and therapeutic procedures for the paediatric patient
- 7. Interpret important imaging and laboratory results
- 8. Diagnose illness based on the analysis of history, physical examination and investigations
- Plan and deliver comprehensive treatment for illness using principles of rational drug therapy
- 10. Plan and advice measures for the prevention of childhood disease and disability
- 11. Plan rehabilitation of children with chronic illness and handicap and those with special needs
- 12. Manage childhood emergencies efficiently
- 13. Provide comprehensive care to normal, 'at risk' and sick neonates
- 14. Demonstrate skills in documentation of cae details, and of morbidity and mortality data relevant to the assigned situation
- 15. Recognize the emotional and behavioral characteristics of children, and keep these fundamental attributes in focus while dealing with them
- 16. Demonstrate empathy and humane approach towards patients and their families and keep their sensibilities in high esteem
- 17. Demonstrate communication skills of a high order in explaining management and prognosis, providing counseling and giving health education messages to patients, families and communities
- 18. Develop skills as a self-directed learner. Recognize continuing educational needs; use appropriate learning resources and critically analyze published literature in order to practice evidence-based Paediatrics
- 19. Demonstrate competence in basic concepts of research methodology and epidemiology
- 20. Facilitate learning of medical/nursing students, practicing physicians, paramedical health workers and other providers as a teacher-trainer
- 21. Implement National Health Programs, effectively and responsibly

- 22. Organize and supervise the desired managerial and leadership skills
- 23. Function as a productive member of a team engaged in health car, research and education.
- 24. Recognize mental conditions, characterized by self absorption, reduced ability to respond, abnormal functioning in social interaction with or without repetitive behavior, poor communication (autism) and collaborate with Psychiatrists/Child Psychologists for the treatment of such patients.

All PG students joining the course should have an orientation session to acquaint them with the requirements and other details. A plan for orientation session has been given at Annexure 1.

#### **B.** Affective Domain:

- 1. Should be able to function as a part of a team, develop an attitude of cooperation with colleagues, and interact with the patient and the clinician or other colleagues to provide the best possible diagnosis or opinion.
- 2. Always adopt ethical principles and maintain proper etiquette in dealings with patients, relatives and other health personnel and to respect the rights of the patient including the right to information and second opinion.
- Develop communication skills to word reports and professional opinion as well as to interact with patients, relatives, peers and paramedical staff, and for effective teaching.

# C. Psychomotor domain

#### At the end of the course, the student should have acquired following skills:

### I. History and Examination

The student must gain proficiency in eliciting, processing and systemically presenting Paediatrics history and examination with due emphasis of the important and minimization of less important facts. The following skills must be achieved:

- i) Recognition and demonstration of physical findings
- ii) Recording of height, weight, head circumference and mid arm circumference and interpretation of these parameters using growth reference standard assessment of nutritional status and growth
- iii) Assessment of pubertal growth
- iv) Complete developmental assessment by history and physical examination,
   and recognizing developmental disabilities, including autism
- v) Systemic examination
- vi) Neonatal examination including gestation assessment by physical/neurological criteria

Paediatrics 18

3

vii) Examination of the fundus of eye and the ear-drum viii) Skills related to IMNCI and IYCF

# II. Monitoring Skills

Non-invasive monitoring of blood pressure, pulse and respiratory rates, O2 saturation; ECG

# **III.** Investigative Procedures

- i) Venous, capillary and arterial blood sampling using appropriate precautions
- ii) Pleural, peritoneal, pericardial aspiration; subdural, ventricular and lumbar puncture
- iii) Tuberculin test
- iv) Biopsy of liver and kidney
- v) Urethral catheterization and suprapubic tap
- vi) Gastric content aspiration

#### IV. Therapeutic Skills

- i) Breast feeding assessment and counseling; management of common problems
- ii) Establishment of central and peripheral vascular access; CVP monitoring
- iii) Administration of injections using safe injection practices
- iv) Determination of volume and composition of intravenous fluids and heir administration
- v) Neonatal and Pediatric basic and advanced life support
- vi) Oxygen administration, CPAP and Nebulizaion therapy
- vii) Blood and blood component therapy
- viii) Intraosseous fluid administration
- ix) Phototherapy, umbilical artery and venous catheterization and exchange transfusion
- x) Nasogastric feeding
- xi) Common dressings and abscess drainage; intercostal tube insertion
- xii) Basic principles of rehabilitation
- xiii) Peritoneal dialysis
- xiv) Mechanical ventilation- Invasive and non-invasive ventilation
- xv) Point of care Ultrasound: a) Neurosonogram
  - b) Functional echo

# V. Bed side investigations, including

- i) Complete blood counts, micro ESR, peripheral smear
- ii) Urinalysis
- iii) Stool microscopy and hanging drop

Paediatrics 19

4

- iv) Examination of CSF and other body fluids
- v) Blood sugar
- vi) Shake test on gastric aspirate

5

#### vii) Gram stain, ZN stain

#### VI. Patient Management Skills

- Proficiency in management of pediatric emergencies, including emergency triaging
- ii) Drawing and executing patient management plan and long term care
- iii) Documenting patient records on day to day basis and problem oriented medical record
- iv) Care of a normal and sick newborn, management of neonatal disorders hypothermia, sepsis, convulsions, jaundice, metabolic problems.
- v) Identifying surgical emergencies ,confirming by investigations, surgical referral,and post-op care
- vi) Identifying need for timely referral to appropriate departments/health facility and pre-transport stabilization of the sick child

#### VII. Communication Skills; Attitudes; Professionalism

- i) Communicating with parents/child about nature of illness and management plan prognostication, breaking bad news, Death certificate
- ii) Counseling parents on breast feeding, nutrition, immunization, disease prevention, promoting healthy life style
- iii) Genetic counseling
- iv) Communication and relationship with colleagues, nurses and paramedical workers
- v) Appropriate relation with pharmaceutical industry
- vi) Health economics
- vii) Professional and research ethics
- viii) HIV Counseling

# **VIII. Interpretation of Investigations**

- i. Plain x-ray chest, abdomen, skeletal system
- ii. Contrast radiological studies: Barium swallow, barium meal, barium enema, MCU
- iii. Ultrasound skull and abdomen
- iv. Histopathological, biochemical and microbiological investigations
- v. CT Scan and MRI (skull, abdomen, chest)
- vi. Electrocardiogram, electroencephalogram
- vii. Arterial and venous blood gases
- viii. **Desirable**: Interpretation of radio-isotope studies, audiogram, neurophysiological studies, (BERA, VER, Electromyography [EMG], Nerve Conduction Velocity [NCV]), lung function tests

#### IX. Academic Skills

Paediatrics 21

5

i. Familiarity with basic research methodology, basic IT skills. Planning the protocol of the thesis, its execution and final report

ii. Review of literature

6

- iii. Conducing clinical sessions for undergraduate medical students
- iv. Desirable: writing and presenting a paper. Teaching sessions for nurses and medical workers

# Syllabus

#### **Course contents:**

7. Menstrual problems

#### Guidelines

During the training period, effort must be made that adequate time is spent in discussing child health problems of public health importance in the country or particular region.

B	asic Sciences		
	Principles of inheritance, chromosomal disorders, single gene disorders,		
	multifactorial / polygenic disorders, genetic diagnosis and prenatal diagnosis,		
	pedigree drawing.		
	Embryogenesis of different organ systems especially heart, genitourinary system,		
	gastro-intestinal tract. Applied anatomy and functions of different organ systems.		
	Physiology of micturition and defecation; placental physiology; fetal and neonatal		
	circulation; regulation of temperature, blood pressure, acid base balance, fluid		
	electrolyte balance and calcium metabolism.		
	Vitamins and their functions.		
	Hematopoiesis, hemostasis, bilirubin metabolism.		
	Growth and development at different ages, growth charts; puberty and its regulation.		
	Nutrition: requirements and sources of various nutrients.		
	Pharmacokinetics of common drugs, microbial agents and their epidemiology.		
	Basic immunology, biostatistics, clinical epidemiology, ethical and medico-legal issues		
	Teaching methodology and managerial skills.		
II	nderstanding the definition, epidemiology, aetiopathogenesis, presentation,		
	omplications, differential diagnosis and treatment of the following, but not limited		
to			
G	rowth and development		
	principles of growth and development		
	normal growth and development [] sexual maturation and its disturbances		
[] f	failure to thrive and short stature   Autism (as mentioned in objective 24)		
A	Adolescent health		
1.	Epidemiology		
2.	Sexual Development and SMR stages		
3.	Deliveries of health care		
4.	Pregnancy		
5.	Contraception		
6	STD		

Paediatrics 23

6

- 8. Anorexia nervosa, bulimia
- 9.Depression
- 10.Suicide

Neonat	ology
--------	-------

perinatal care	low birth weight
are in the labor room and resuscitation	newborn feeding
[] prematurity	respiratory distress
Common transient phenomena	apnea
[] infections	
Convulsions	anemia and bleeding disorders

_ jaundice	☐ gastrointestinal disorders
neurologic disorders	☐ malformations
renal disorders	[] understanding of perinatal medicine
thermoregulation and its disorders	
Nutrition	
maternal nutritional disorders;	nutrition for the low birth
weight impact on fetal outcome	☐ breast feeding
infant feeding including	🛮 vitamin and mineral
deficiencies complementary feeding	
protein energy malnutrition	obesity
adolescent nutrition	parenteral and enteral nutrition
nutritional management of systemic illness	s (GI, hepatic, renal illness)

# **Metabolic Disorders**

- 1. Approach to IEM defects
- 2. Common aminoacid Metabolic defects
- 3. Porphyria
- 4. Common Lipid Metabolism
- 5. Common CHO Metabolism
- 6. Mucopolysaccharidosis

7. Hypoglycemia	
8. Purine and pyrimidine metabolism	
9. Rare Amino acid Metabolic Defects	
10.Rare Lipid Metabolism-	
11Rare CHO Metabolism-	
12.Mucolipidosis	
Cardiovascular	
[] congenital heart diseases	[] rheumatic fever and rheumatic heart
(cyanotic and acyanotic)	disease
[] infective endocarditis	arrhythmia
disease of myocardium	diseases of pericardium
(cardiomyopathy, myocarditis)	systemic hypertension
[] hyperlipidemia in children	
Respiratory	
[] congenital and acquired disorders of nose	[] infections of upper respiratory tract
tonsils and adenoids	obstructive sleep apnea
[] congenital anomalies of lower respiratory	tract
[] foreign body in larynx trachea and bronch	us [] trauma to larynx
[] subglottic stenosis (acute, chronic)	neoplasm of larynx and trachea
[] bronchial asthma	☐ bronchiolitis
acute pneumonia, bronchiolitis	aspiration pneumonia, GER
[] recurrent, interstitial pneumonia	suppurative lung disease
atelectasis	lung cysts, mediastinal mass
pleural effusion	
Gastrointestinal and liver disease	
disease of oral cavity	disorders of deglutition and
esophagus	
peptic ulcer disease	ongenital pyloric stenosis
[] intestinal obstruction	acute and chronic pancreatic
disorders	

acute and chronic diarrhea
[] inflammatory bowel disease
anorectal malformations
hepatic failure
Budd-Chiari syndrome
cirrhosis and portal hypertension
xanthema syndrome
urinary tract infection
involvement in systemic diseases
neurogenic bladder, voiding
renal and bladder stones
hydronephrosis
☐ Wilms tumor
_
epilepsy, epileptic syndromes
☐ brain abscess
Guillain-Barre syndrome
HIV encephalopathy
cerebral palsy
neurodegenerative disorders
mental retardation
muscular dystrophies
☐ malformations
☐ Tumors
hemolytic anemias
pancytopenia
disorders of hemostasis
[] transfusion related infections
acute and chronic leukemia
Lymphoma
hypercoagulable states
diabetes insipidus
hypo – and hyper-thyroidism

adrenal insufficiency	Cushing's syndrome
adrenogenital syndromes	diabetes mellitus
[] hypoglycemia	short stature
gonadal dysfunction and intersexuality	obesity
Infections	
☐ bacterial (including tuberculosis)	[] viral (including HIV)
[] fungal	parasitic
[] rickettssial	[] mycoplasma
protozoal and parasitic	nosocomial infections
[] control of epidemics and infection prevention	safe disposal of infective material
Emergency and Critical Care	
emergency care of shock	ardio-respiratory arrest
[] respiratory failure	acute renal failure
status epilepticus	acute severe asthma
[] fluid and electrolyte disturbances	acid-base disturbances
poisoning	accidents
scorpion and snake bites	
Immunology and Rheumatology	
arthritis (acute and chronic)	vasculitides
immunodeficiency syndromes	systemic lupus erythematosus
ENT	
acute and chronic otitis media	hearing loss
post-diphtheritic palatal palsy	acute/chronic tonsillitis/adenoids
allergic rhinitis/sinusitis	[] foreign body
Skin Diseases	
[] exanthematous illnesses	[] vascular lesions
pigment disorders	[] vesicobullous disorders
infections	Steven-Johnson syndrome
atopic, seborrheic dermatitis	drug rash
☐ alopecia	icthyosis
Eye problems	
[] refraction and accommodation	partial/total loss of vision
cataract	night blindness
strabismus	onjunctival and corneal disorders

disorders of retina, including tumors	
Behavioral and Developmental disorders	
rumination, pica	enuresis, encopresis
sleep disorders	habit disorders
breath holding spells	anxiety disorders
[] mood disorders	[] temper tantrums
attention deficit hyperactivity disorders	autism (as mentioned in objective 24)
Social/Community Paediatrics	
national health programs related to child health	[] IMNCI
[] Vaccines: constituents, efficacy, storage, contrain	dications and adverse reactions
[] rationale and methodology of pulse polio immuni	zation
[] child labor, abuse, neglect	adoption
disability and rehabilitation	[] rights of the child
National policy of child health and population	juvenile delinquency
Principles of prevention, control of infections (for	od, water, soil, vector borne)
[] Investigation of an epidemic	
Orthopaedics	
[] major congenital orthopedic deformities	bone and joint infections
ommon bone tumors	
Approach to clinical problems	
Growth and development	
precocious and delayed puberty	developmental delay
[] impaired learning	
Neonatology	
low birth weight newborn	sick newborn
Nutrition	
[] lactation management and complementary	protein energy malnutrition
feeding	(underweight, wasting, stunting)
[] failure to thrive	and micronutrient deficiencies
Cardiovascular	
[] Murmur	[] cyanosis

congestive heart failure	systemic hypertension
arrhythmia	shock
GIT and Liver	
Acute diarrhea	persistent and chronic diarrhea
abdominal pain and distension	ascites
[] vomiting	constipation
gastrointestinal bleeding	jaundice
hepatosplenomegaly	hepatic failure and encephalopathy
Respiratory	
Cough/chronic cough	hemoptysis
[] wheezy child	[] respiratory distress
Infections	
acute onset pyrexia	prolonged pyrexia with and
recurrent infections	without localizing signs
nosocomial infections	[] fever with xanthema
Renal	_
[] Hematuria/dysuria	bladder/bowel incontinence
voiding dysfunctions	renal failure (acute and chronic)
hypertension	
Hematology and Oncology	
anemia	bleeding
Neurology	
limping child	☐ convulsions
paraplegia, quadriplegia	cerebral palsy
macrocephaly and microcephaly	[] floppy infant
acute flaccid paralysis	[] headache
Endocrine	
[] thyroid swelling	ambiguous genitalia
obesity	short stature
u oocsity	U SHOIT STATUTE
Miscellaneous	
☐ skin rash	[] lymphadenopathy
[] epistaxis	proptosis
arthralgia, arthritis	

# TEACHING AND LEARNING METHODS

# Postgraduate teaching programme

#### **General principles**

Acquisition of practical competencies being the keystone of PG medical education, PG training should be skills oriented. Learning in PG program should be essentially self-directed and primarily emanating from clinical and academic work. The formal sessions are merely meant to supplement this core effort.

# **Teaching methodology**

This should include regular bedside case presentations and demonstrations, didactic lectures, seminars, journal clubs, clinical meetings, and combined conferences with allied departments. The post graduate student should be given the responsibility of managing and caring for patients in a gradual manner under supervision. Department should encourage e-learning activities.

#### Formal teaching sessions

In addition to bedside teaching rounds, at least 5-hr of formal teaching per week are necessary. The departments may select a mix of the following sessions:

Case Discussion : Once in a week

Journal Club : Once in a week

Internal department meet Seminar : Once in Month

Once in a week

CPC : Once in a month

Mortality meeting : Once in a month

Pedagogy : Once in a Month

Theory class for PG : Once in a month

Attend accredited scientific meetings (CME, symposia, and conferences).

- Additional sessions on resuscitation, basic sciences, biostatistics, research
  methodology, teaching methodology, hospital waste management, health
  economics, medical ethics and legal issues related to pediatric practice are
  suggested.
- There should be a training program on Research methodology for existing faculty to build capacity to guide research.
- The postgraduate students shall be required to participate in the teaching and training programme of undergraduate students and interns.
- A postgraduate student of a postgraduate degree course in broad specialities/super specialities would be required to present one poster presentation, to read one paper at a national/state conference and to present one research paper which should be published/accepted for publication/sent for publication during the period of his postgraduate studies so as to make him eligible to appear at the postgraduate

- Log book: During the training period, the post graduate student should maintain a Log Book indicating the duration of the postings/work done in Pediatric Wards, OPDs and Casualty. This should indicate the procedures assisted and performed, and the teaching sessions attended. The purpose of the Log Book is to:
  - a) Help maintain a record of the work done during training,
  - b) Enable Consultants to have direct information about the work; intervene if necessary,
  - c) Use it to assess the experience gained periodically.

The log book shall be used to aid the internal evaluation of the student. The Log books shall be checked and assessed periodically by the faculty members imparting the training.

#### **Rotations**

The postgraduate student should rotate through all the clinical units in the department. In addition, following special rotations should be undertaken:

#### Mandatory

Neonatology, perinatology - 3 months per year (Total 9 months for 3 years) Intensive care, emergency- 3 months per year (Total 9 months for 3 years)

#### **Desirable**

Posting in Out Patient Services of the following specialties is recommended

Skin -1 week Pediatric Surgery- 1week Radiology- 1 week Nephrology -1 week

Physical Medicine and Rehabilitation- 1 week

Community Medicine- 1 week

**Note:** Additionally, the PG students may be sent to allied specialties (Cardiology, Neurology, nephrology *etc.*) depending on facilities available. It should be ensured that the training conforms to the curriculum.

### • Thesis

#### **Objectives**

By carrying out a research project and presenting his work in the form of thesis, the student shall be able to:

Sti	ident shall be able to:
	identify a relevant research question
	conduct a critical review of literature
	formulate a hypothesis
	determine the most suitable study design
	state the objectives of the study
	prepare a study protocol
	undertake a study according to the protocol

Paediatrics 32

13

	analyze and interpret research data, and draw conclusions
	write a research paper
Guidelines	
While	selecting the topic, following should be kept in mind:
	the scope of study is limited to enable its conduct within the resources and time
	available
	the study must be ethically appropriate
	the emphasis should be on the process of research rather than the results
	the protocol, interim progress and final presentation is made formally to the
	department
	only one student per teacher/thesis guide
There	should be periodic department review of the thesis work, as per following
schedu	ıle:
End o	f 6 months Submission of protocol
During	g 2 <sup>nd</sup> yr Mid-term presentation

During the training programme, patient safety is of paramount importance; therefore, skills are to be learnt initially on the models, later to be performed under supervision followed by performing independently. For this purpose, provision of skills laboratories in medical colleges is mandatory.

Final presentation; submission

#### ASSESSMENT

#### FORMATIVE ASSESSMENT, ie., assessment to improve learning

Formative assessment should be continual and should assess medical knowledge, patient care, procedural & academic skills, interpersonal skills, professionalism, self directed learning and ability to practice in the system.

#### **General Principles**

6 months prior to examination

Internal Assessment should be frequent, cover all domains of learning and used to provide feedback to improve learning; it should also cover professionalism and communication skills. The Internal Assessment should be conducted in theory and practical/clinical examination.

# Quarterly assessment during the MD training should be based on:

- 1. Journal based / recent advances learning
- 2. Patient based /Laboratory or Skill based learning
- 3. Self directed learning and teaching
- 4. Departmental and interdepartmental learning activity
- 5. External and Outreach Activities / CMEs

Paediatrics 33

14

The student to be assessed periodically as per categories listed in postgraduate student appraisal form (Annexure I).

### SUMMATIVE ASSESSMENT, ie., assessment at the end of training

The summative examination would be carried out as per the Rules given in POSTGRADUATE MEDICAL EDUCATION REGULATIONS. 2000.

The postgraduate examination shall be in three parts:

### 1. Thesis

Thesis shall be submitted at least six months before the Theory and Clinical / Practical examination. The thesis shall be examined by a minimum of three examiners; one internal and two external examiners, who shall not be the examiners for Theory and Clinical examination. A post graduate student shall be allowed to appear for the Theory and Practical/Clinical examination only after the acceptance of the Thesis by the examiners.

### 2. Theory examination

The examinations shall be organized on the basis of 'Grading'or 'Marking system' to evaluate and to certify post graduate student's level of knowledge, skill and competence at the end of the training. Obtaining a minimum of 50% marks in 'Theory' as well as 'Practical' separately shall be mandatory for passing examination as a whole. The examination for M.D./ MS shall be held at the end of 3rd academic year. An academic term shall mean six month's training period.

There shall be four theory papers. Each paper should have 10 short essay questions (SEQ).

**Paper I:** Basic sciences as applied to Paediatrics

Paper II: Neonatology and community Paediatrics

Paper III: General Paediatrics including advances in Paediatrics relating to Nutrition, Growth and Development, Immunization, Infectious disease, Genetics, Immunology, Rheumatology, Psychiatry and Behavioral Sciences, Skin, Eye, ENT, Adolescent Health, Critical Care, Accidents and Poisoning

Paper IV: Paediatric Medicine including advances in Paediatrics relating to

Neurology and Disabilities, Nephrology, Hematology

Oncology, Endocrinology, Gastroenterology and Hematology,
Respiratory and Cardiovascular disorders

## 3. Practical/clinical and Oral/viva voce examination

## b) Clinical Examination

**Practical examination** 

300 Marks

	No. of Cases	Marks	
Long Case	1	150	15

Total	3	300
Newborn	1	75
Short Case	1	75

### c) Viva-Voice:

100 Marks

1) Viva-Voce Examination: (80 Marks)

All examiners will conduct viva-voce conjointly on candidate's comprehension, analytical approach, expression and interpretation of data. It includes all components of course contents. In addition candidates may be also be give case reports, charts, gross specimens, pathology slides, X-rays, ultrasound, CT scan images, for interpretation. It may include discussion on dissertation also.

### 2) Pedagogy Exercise:

(*Marks* 20)

A topic be given to each candidate in the beginning of clinical examination. He/she is asked to make a presentation on the topic for 8-10 minutes.

OSCE may be used.

Maximum Marks for	Theory	Practical	Viva	<b>Grand Total</b>
M.D. degree course	400	300	100	800

#### **SECTION - IV**

#### MEDICAL ETHICS & MEDICAL EDUCATION

### **Sensitization and Practice**

### Introduction

There is now a shift from the traditional individual patient, doctor relationship, and medical care. With the advances in science and technology and the needs of patient, their families and the community, there is an increased concern with the health of society. There is a shift to greater accountability to the society. Doctors and health professionals are confronted with many ethical problems. It is, therefore necessary to be prepared to deal with these problems. To accomplish the Goal (i), General Objectives (ii) stated in Chapter II (pages 2.1 to 2.3), and develop human values it is urged that **ethical sensitization** be achieved by lectures or discussion on ethical issues, clinical case discussion of cases with an important ethical component and by including ethical aspects in discussion in all case presentations, bedside rounds and academic postgraduate programs.

#### **Course Contents**

### 1. Introduction to Medical Ethics

What is Ethics?

What are values and norms?

Relationship between being ethical and human fulfillment

How to form a value system in one's personal and professional life

Heteronymous Ethics and Autonomous Ethics

Freedom and personal Responsibility

### 2. Definition of Medical Ethics

Difference between medical ethics and bio-ethics

Major Principles of Medical Ethics 0

Beneficence = fraternity
Justice = equality
Self determination (autonomy) = liberty

### 3. Perspective of Medical Ethics

The Hippocratic Oath

The Declaration of Helsinki

The WHO Declaration of Geneva

International code of Medical Ethics (1993)

Medical Council of India Code of Ethics

### 4. Ethics of the Individual

The patient as a person

The Right to be respected

Truth and confidentiality

The autonomy of decision

The concept of disease, health and healing

The Right to health

Ethics of Behavior modification

The Physician – Patient relationship

Organ donation

### 5. The Ethics of Human life

What is human life?

Criteria for distinguishing the human and the non-human

Reasons for respecting human life

The beginning of human life

Conception, contraception

Abortion

Prenatal sex-determination

In vitro fertilization (IVF), Artificial Insemination by Husband (AIH)

Artificial Insemination by Donor (AID)

Surrogate motherhood, Semen Intra fallopian Transfer (SIFT),

Gamete Intra fallopian Transfer (GIFT), Zygote Intra fallopian Transfer (ZIFT),

Genetic Engineering

### 6. The family and society in Medical Ethics

The Ethics of human sexuality

Family Planning perspectives

Prolongation of life

Advanced life directives – The Living Will

Euthanasia

Cancer and Terminal Care

### 7. Profession Ethics

Code of conduct

Contract and confidentiality

Charging of fees, Fee-splitting

Prescription of drugs

Over-investigating the patient

Low – Cost drugs, vitamins and tonics

Allocation of resources in health cares

Malpractice and Negligence

#### 8. Research Ethics

Animal and experimental research / humanness

Human experimentation

Human volunteer research – Informed Consent

Drug trials\

ICMR Guidelines for Ethical Conduct of Research – Human and Animal

ICH / GCP Guidelines

Schedule Y of the Drugs and Cosmetics Act.

### 9. Ethical work -up of cases

Gathering all scientific factors

Gathering all human factors

Gathering value factors

Identifying areas of value – conflict, setting of priorities,

Working our criteria towards decisions
