Fore Word from The Chairman Clinical Skills Laboratory

One of the major components of Medical education is training individuals in various Skills related to health care. Be it clinical skills, behavioral skills or communication skills. Knowledge component can be obtained by various resources. But appropriate training in clinical & surgical skills is essential for producing a competent health care professional. Training directly on patients has its challenges due to limited opportunities, safety of patients is a concern & reluctant patients also limit the chances.

In such scenario, Clinical Skills Laboratory provides a stress free environment for learning & honing skills under direct supervision.

Our clinical skills laboratory is equipped & capable of training of basic & advanced clinical skills for various levels of learners. With this objective, University Clinical Skills Laboratory is established.

Dr. Tejaswini Vallabha

INTRODUCTION

Surgical specialty has progressed in leaps and bounds in the last 3 decades. With the advent of highly technical investigative and therapeutic tools surgical procedures have become highly specific, precise with reduced morbidity. The modern doctor provides effective care only by using these tools. Effective training is required before a doctor can use these tools. Among the three major domains of learning for a doctor, Viz. Knowledge, Skills and ethics, knowledge and ethics are learnt relatively easily by various teaching/learning methods with existing facilities. Learning skills, however, is a major challenge. It is a challenge because

- opportunities for learning are limited
- Safety of patients during training is a concern
- Patient expectations are high, with a reluctance to let trainees do procedures.
- Honing the skills on patients directly is a problem.

Hence, it is important to impart basic skills in the laboratory / Training Centre environment and then allow the reasonably trained student to hone his skills further, on a patient. Basic Surgical Skills Centre (BSSC) would meet this requirement.

This need has been realized for many years in western countries. Many countries mandate a formal certificate in Basic Surgical Skills before allowing students to take postgraduate examinations.

Beneficiaries:

1. MBBS STUDENTS
2. MD/MS STUDENTS
3. NURSING STUDENTS [Diploma, B.Sc and M.Sc]
4. OT TECHNOLOGISTS
4. PARA MEDICAL COURSE STUDENTS

[Any individual involved in patient care in most of the surgical /critical care will be benefitted.]

Postgraduates need advanced training in surgical skills including Laparoscopic surgical skills; Postgraduates from various surgical disciplines would need a common set surgical skills like dissection techniques, suturing, knot tying, laparoscopic skills, wound management skills etc.

The term postgraduate would also encompass many 'medical' specialties undertaking invasive procedures like insertion of chest drains, pacemakers, liver biopsies etc.

This centre functions as nodal centre for training not only our University students but is also planning to include students of other institutes as well in this academic year.

With these priorities in mind this centre was planned and established.

GOAL:

To act as centre of excellence in learning basic and advanced skills so as to enable health care profession students to be competent in delivering the health care needs effectively.

Objectives:

To train and develop necessary clinical skills in medical undergraduate, post graduate students, paramedical students as per needs and competency statements of various courses.

To develop and act as a resource centre for such activities and co ordinate between various sections for effective delivery.

To develop resources, materials and course curricula required for various courses.

To train and certify the learners and faculty necessary for conducting courses or establishing such centres elsewhere.

To provide intellectual support for upcoming centres.

With the above mentioned objectives Standing Committee for Skills Lab establishment was constituted by the University on 19/01/12

Standing Committee for Skills Lab is constituted as per BLDE University MoA rule R-26 (n) and notified as follows

1	Chairman	Dr. Tejaswini Udachan-Vallabh Prof. & Head, Surgery
2	Member	Dr. Yoganarsimha Prof. & Head, Forensic Medicine
3	Member	Dr. Ashok Naik Professor of Orthopedics
4	Member	Dr. Manpreet Kaur Professor of Obstetrics & Gynecology
5	Member	Prof. Shalmon S. Chopade Principal, Shri. B. M. Patil College of Nursing

8	Dr. Vijaykumar Kalyanappagol Professor of Anaesthesiology	Member (Convener)

The committee visited various institutes who were running and established skills laboratories like Melaka Medical College, Manipal, Kasturba Medical College Manipal and Bangalore Institute of Medical Sciences Alumni Association. It had the opportunity to interact with experts in this area

like Dr. K. Lakshman, Bangalore and Dr. Ramkumar, Manipal.

With their guidance and sufficient homework, the committee met several times and deliberated regarding the space, equipments, training programmes etc and Later, further two meetings were held to finalize finer issues and procurement on 5th Meeting was held on 30th April 2012 , 6th Meeting on 30th November ,7th Meeting on 18th December 2012 .

It was decided to inaugurate on 23rd December and invite Dr K. Lakshman and team who were instrumental in guiding and are known resource persons for such activities. They were also requested to conduct **one training for trainers workshop** for the local faculty.

To facilitate smooth running of the laboratory Chief co- coordinator and co-coordinator were appointed.

University Cadaver Laboratory

Goal:

To be a innovative centre for training of surgical skills and serve as regional centre for training in advanced surgical skills in real-time setting.

Preamble:

Modern science, especially surgical specialties have grown in exponential manner in last few decades. Precision, accurate technique and good competence in conducting variety of surgeries are need of the hour. Practically every year the skills need to be upgraded. Learnt skills also need fine tuning.

However, exposure to adequate number of special surgeries, more so hands on experience is difficult to achieve due to concerns about patient safety, ethical issues & medico legal issues.

Simulation laboratories do support this concern to a great extent, but they do not replace the actual feel of human tissue. Here Cadaver Laboratories act as bridges. The scope & utility of Cadaver Laboratories are unlimited.

Keeping this in mind & with the positive experience obtained after establishment of Clinical Skills Laboratory, University decided to establish Cadaver Laboratory.

All the surgical specialty departments were involved & had few sessions & were requested to come up with procedures which could be demonstrated/taught in Cadaver Laboratory.

It was also decided that the pivotal role will be played by Department of Anatomy, who will procure bodies, maintain the laboratory, co-ordinate with learning teams & schedule the activities. They will also support the learning teams by guiding them during actual procedure.

As part of know how towards establishment of Cadaver Laboratory, a team comprising of Visited M.S.Ramaiah Centre for Advanced Learning, Bengaluru on April 1, 2017.

1. Dr. Tejaswini Vallabha, Vice Principal and Prof. & HOD of Surgery
2. Dr. Girish Kullolli, Assoc. Prof. of Surgery
3. Dr. Shivanand L. K Asst. Prof. of Anaesthesiology
4. Dr. Deshpande S. H. (Dr. Sandhya Yatagiri), Asst. Prof. of Anatomy

After basic understanding Cadaver Laboratory establishment was initiated and team was notified. This committee met several times and collected details, interacted with various authorities and inauguration of the Laboratory was done on August 7, 2017.

It was decided that Once a new Cadaver arrives to department of Anatomy, it should be kept unembalmed and stored in cold chamber for use in Cadaver Lab. Chief co ordinator was requested to take responsibility of the same. This has to be informed to concerned departments for their schedule to be fixed. The schedule should be informed well advance to department of Anatomy to make the necessary arrangements.

It was decided to request Registrar to direct the concerned for E-mail to be created for Cadaver Lab to make it convenience for all co-ordinators to communicate with each other.

The meeting ended with vote of thanks.

Report on inauguration of Cadaver Laboratory

The Inaugural function of the cadaver laboratory was held on 07-08-2017 in the Department of Anatomy. It was inaugurated by Prof. K. S. Dhindsa, UGC nominee and Member of Planning and Monitoring Board of BLDE University.

The following Members were present:

- | | |
|----------------------------|---|
| 1. Prof. Dr. M S Biradar | Vice Chancellor |
| 2. Dr. K S Dhindsa | UGC Nominee |
| 3. Dr. Vivek Saoji | Vice Chancellor (KLE University, Belgaum) |
| 4. Dr. R S Mudhol | Director, JNMC KLE University Belgaum |
| 5. Dr. S P Guggarigoudar | Dean, FoM & Principal |
| 6. Dr. Vijayakumar K | Medical Superintendent |
| 7. Dr. Tejaswini Vallabha | Vice Principal |
| 8. Dr. J G Ambekar | Registrar |
| 9. Dr. B M Bannur | Prof & Head Dept of Anatomy |
| 10. Dr. Sandhya V Yatagiri | Chief co-ordinator, Cadaver Lab |

Other staff members of Pre-Para and clinical departments also attended the inaugural function.

Hon'ble Vice Chancellor welcomed the members. He expressed gratefulness to Dr. K. S. Dhindsa, Dr. Vivek Saoji and Dr. R. S. Mudhol for making it convenient to attend the function.
